

## Impact Recording Patrol Reader

- Reinforced Stainless Steel/Aluminium Alloy tubing with sealed rubber outer shell
- In-built impact detection - registers date/time when impact occurred
- Buttonless operation - just position reader 3-6cm in front of an RFiD tag
- Flashing LED and audible bleep when an RFiD tag read occurs
- Light Weight - 150 grams
- Compact size - 130x28x27mm
- Huge capacity of 30,719 read capacity between downloads
- Cyclic FLASH memory.
- Average 2 years battery life (assuming an average of 200 reads per day)
- Wireless communication to "PM" Series download stations
- Intrinsically Safe - suitable for use in explosive atmospheres
- Totally waterproof – will work fully immersed
